Front-End Developer

Self-taught developer skilled in building responsive, accessible, and user-focused websites. Experienced in crafting modern UIs using HTML, CSS, JavaScript, and Tailwind CSS. Focused on writing clean code and continuously learning new tools and best practices.

Projects

Personal portfolio website

HTML, CSS, JS

- Used fundamentals to showcase my skills projects made with **light/dark toggle theme**.
- Used **CSS variables**, **flex-box layout** and **media-queries** for responsive features and **JS DOM** for interactivity.
- Deployed on **GitHub**.

E-commerce MVP

Vite, React, Redux, tailwind, node.js

- Used **Vite** create app for faster development and building environment.
- Used **React components** for dynamic UI rendering, and **Redux-Toolkit** to maintain global state.
- Used **tailwind CSS** for responsive styling and deployed on **Netlify**.

Reddit Clone

Vite, React, Redux, Express.js, Node.js

- Used **Vite** to create app with **React Components** and **Redux global state** for an interactive app.
- Used **Express.js** for backend server to **fetch** data from **Reddit API**, and store it dynamically.
- Deployed backend server on **Render** and app on **Netlify**.

Jamming (Spotify)

ReactApp, node.js, Express.js

- Used **Create-React-App** for development, and to render Dynamic components.
 - Used **Async-Thunk** request to fetch Data from **Spotify API** and **Authenticate** users Account.
 - Deployed on **Netlify**
-
